

Mounting configurations

Clean Chute is a modular component enabling implementation both directly to the parent equipment or through interface features.

	
<p>Direct mount</p>	<p>Through hole lift</p>
	
<p>Hinge plate</p>	<p>Flange plate</p>
	
<p>Mobile bollard</p>	<p>Column mounted</p>

It is recommended that appropriate operational personnel are engaged to understand the requirements unique to your operation when implementing Clean Chute products.
